

# NET ZERO COMMITMENTS

## NET ZERO COMMITMENTS

Supplier Name: I.E.D Installations Ltd

Publication Date: 8<sup>th</sup> May 2025

### COMMITMENTS TO ACHIEVING NET ZERO

I.E.D Installations Ltd is committed to working towards achieving Net Zero by 2030. In order to meet this goal the company has established a process to monitor and record measures and achievements effecting a reduction in carbon emissions.

This process will include the following:

- A study of current carbon emissions at company head office and site attendance.
- Note current measures and monitor their efficiencies in maintaining low emissions.
- Identifying additional actions that can be taken to reduce carbon emissions and improve environmental best practice.
- Develop an Environmental Management System (EMS) to ensure all practices are followed.
- Ongoing communication to all employees and subcontractors on environmental requirements and best practices.
- Work with members of the supply chain to confirm that suppliers and partners are in-line with the environmental standards and considerations expected by I.E.D Installations Ltd

#### Timeline of process

Item	Delivered by:
Carbon Footprint Study	End 2025
