Service**

SOUTHPORT & ORMSKIRK NHS TRUST

- Project Value: £573,000
- Project Type: Site Upgrade
- Project Aim: Electrical & Building Upgrade
- Project Completion: November 2025

SOUTHPORT & ORMSKIRK NHS TRUST

The trust wanted to acquire property to use to train staff, they were offered the property at: - 4-6 Hardshaw Street, St. Helens, WA10 1EB. We were tasked with stripping out the existing interior to the first and second floor whilst retaining the basement and ground floor as they are with the exception of decoration and new flooring.

IED Disciplines

IED Installations Group successfully secured the scheme following successful projects executed within the Capital Projects team over an extended period of service.

The Program ran for 22 weeks after being extended due to alterations to the second-floor design due to being forced to move the training suite on the second floor. We coordinated directly with Ellis Williams Architects & the Trust to deliver:

- Strip out existing walls and ceilings to the first and second floors as per demolition plan.
- New Containment Ladder Rack system to the first and second floor (basket and galvanized trunking).
- Install new electrical small power, lighting, data, access control, and fire alarm throughout with some existing to be retained to the basement and ground floor.
- Install new walls and ceilings as per architects plans to first and second floor.
- New decoration throughout (walls only)
- New fire doors installed as required.
- New radiators and AC installed.
- New Doc M WC installed on the first floor.
- Dummy Doc M WC including bath and shower installed for training purposes (2nd floor).
- Consult with clients preferred contractor to install immersive interactive (training suite) to the second floor (including being involved in the repositioning of the suite due to needing additional ceiling height than had been allowed for).
- New Ventilation alterations.
- Conducted structural roof repairs.
- Conducted repairs to slate roof.
- New Vinyl flooring to ground first and second floors.
- Fire stopping to our newly formed wall penetrations.
- Testing and Commissioning.
