ST MARGARETS HIGH SCHOOL, AIGBURTH

- Project Value: £115,000
- Project Type: Site Upgrade
- Project Aim: Sub Mains Infrastructure.
- Project Completion: December 2025

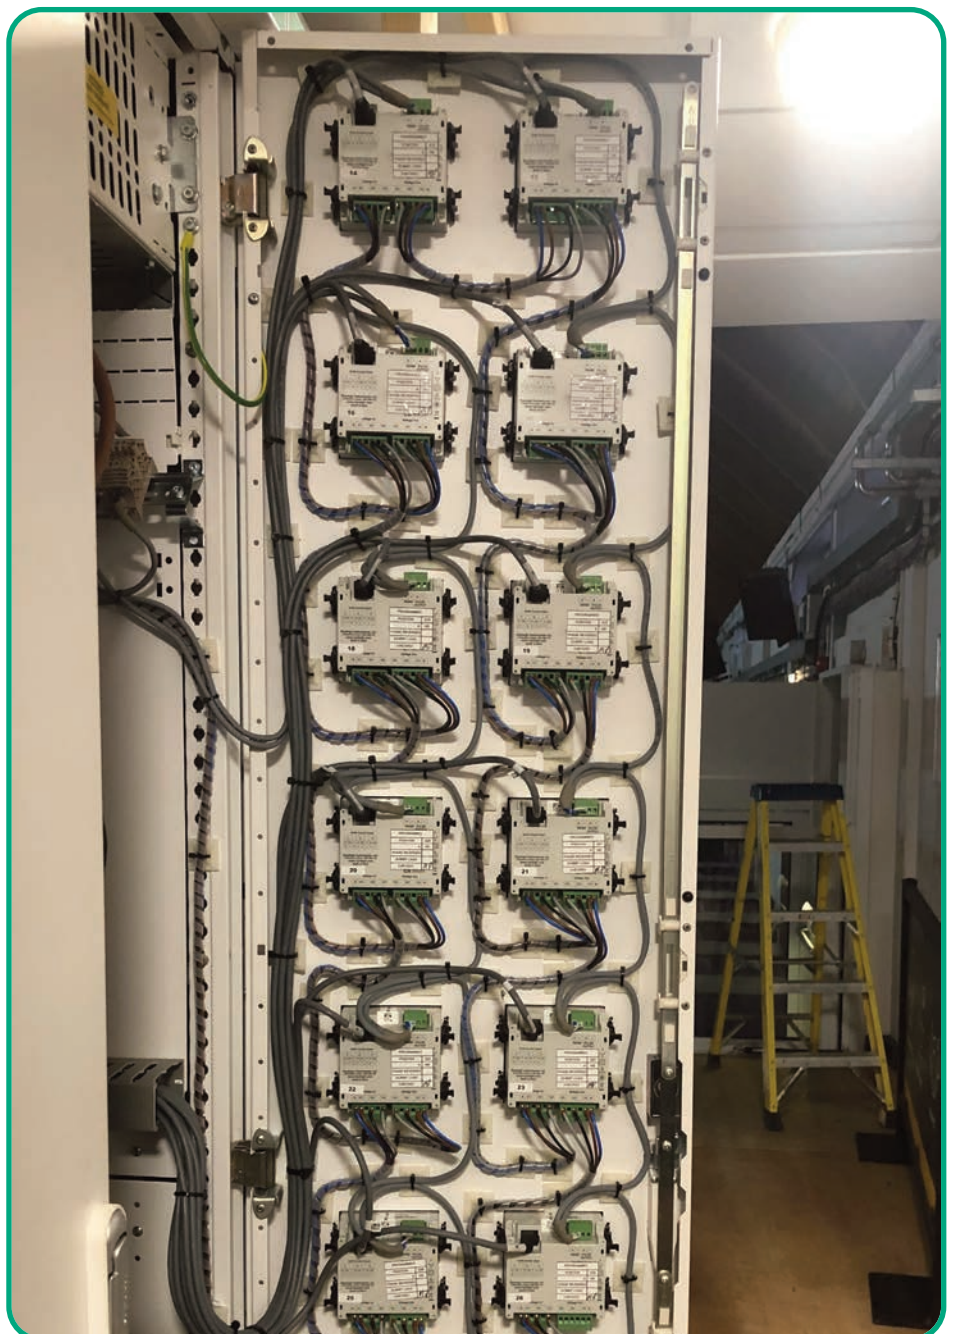

ST MARGARETS HIGH SCHOOL, AIGBURTH

IED Installations Group successfully secured the PSDS scheme as a Preferred Contractor to E3 Cube after Successfully Delivering Additional PSDS Decarbonisation Sustainability Schemes within the northwest region.

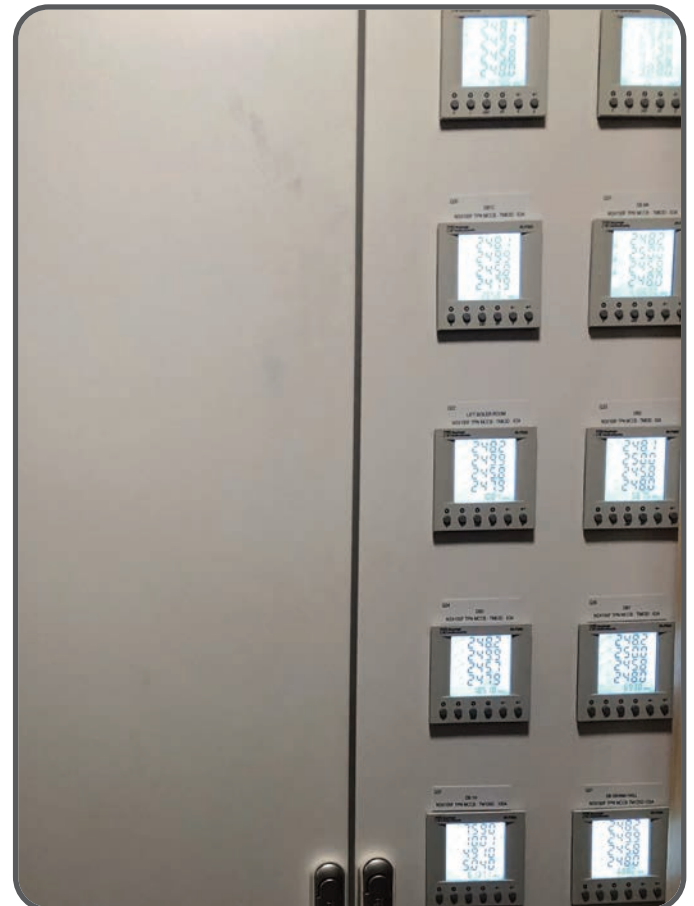

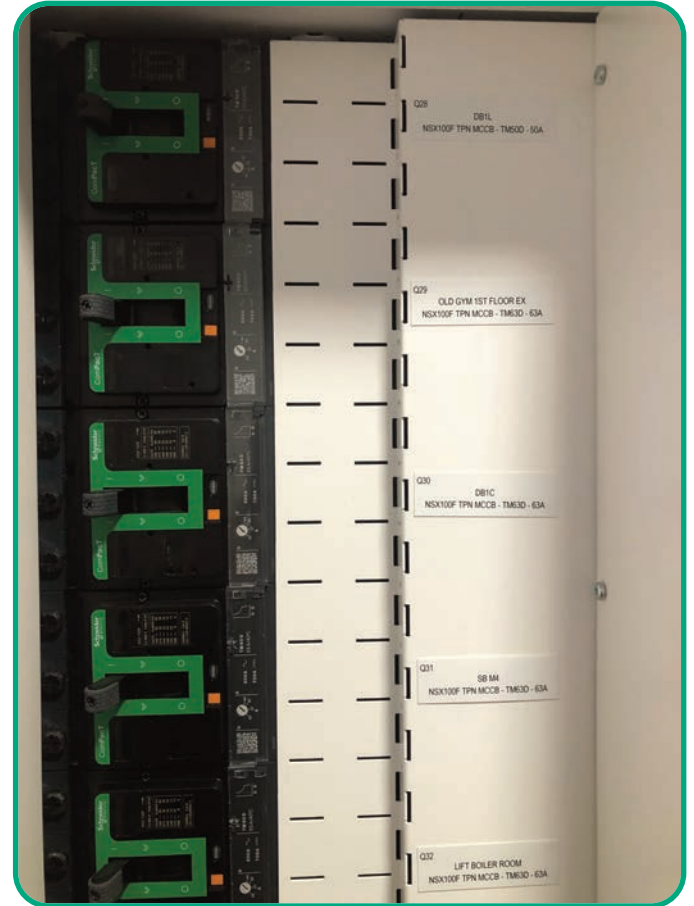

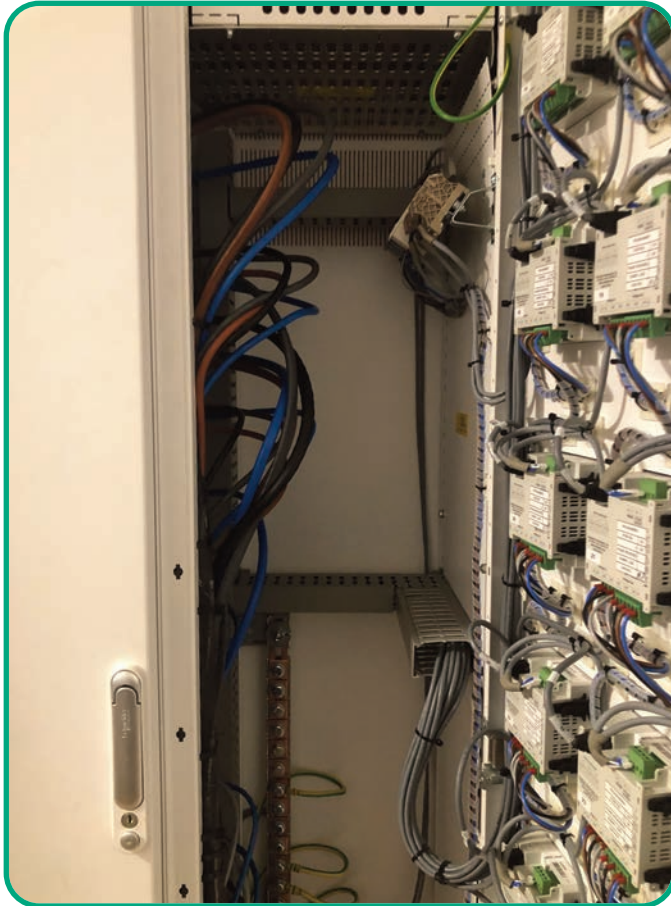

The Programme ran for 5 weeks during the 2025 summer break coordinated in line with the St Margrets Staff to Relocate the Mains Incoming LV Panel in preparation of the new Phased Works, this entailed taking out the staircase where the LV incomer was located to the new agreed location adjacent to the Welfare & Kitchen, then IED were responsible for diverting every sub main under a tight programme prior to the new school term, we received a glowing reference from the Head teacher and Client over the smooth delivery on the scheme with no impact whatsoever to the school and ongoing building, MEP works running parallel to our works.

- ✦ We coordinated directly with E3 Cube & Frank Rogers to deliver:-
- ✦ New Containment to relocate the original Sub Main Infrastructure.
- ✦ Load Assessments of the original distribution by request of Client E3 Cube.
- ✦ Sub Main Wiring to renew the Distribution System.
- ✦ Distribution Board and Main Switchgear Upgrades.
- ✦ Installation of New 800amp 4 Pole LV Main Incoming Panel.
- ✦ Coordination of the DNO.
- ✦ Electrical Testing and Commissioning.
